Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document — the decree, the order and the court decision below are **invented for the demonstration** and reproduce the fiche's own example; in service, the agent cites the real official sources with a link to each. **Nothing is circulated:** the bulletin awaits the signature of the head of the documentation service, and can be taken back with a word until it has gone.

The 2 texts with an impact — with their three dates and their recipient service

Text	Date of publication	Date of entry into force	Deadline for the service to act	Named service	What it changes

Decree raising the advertising thresholds for public contracts	Tuesday the 12th, Official Journal	1st of next month — in 30 days	The 17th — fifteen days ahead	Shared procurement team — 6 buyers, one named officer	Procedure thresholds change; contracts in preparation above the old threshold need re-checking
Order amending an item of the planning application pack	Thursday the 14th, Official Journal	First day of the second following month	Fifteen days before entry into force	Shared development-control service — copied to the 4 municipalities concerned	Item amended for applications lodged from entry into force; applications already lodged are unaffected

The court decision

Decision	Court and date	What it bears on	What it touches at your end	Who decides
Decision on appeal deadlines	Administrative court of appeal, 6 February	Appeal deadlines	The « development control and site notices » guide comments at page 14 on the text the decision was handed down on — the passage is identified and set side by side	The legal team. The agent sets things side by side; it does not conclude.

The sift is published, and it can be challenged. Each of the 172 set aside can be pulled back with a word, with its reason and its date. **It is this record that improved the monitoring:** in the first quarter, **out of 2,150 publications reviewed, 3 had been set aside wrongly — all three on the water and wastewater topic, whose vocabulary was too narrow. 41 terms were added to that topic. In the second quarter, out of 2,150 publications: 0 discards of that kind, and 11 additional publications retained, 2 of them with an impact. This record is published every quarter, unasked: monitoring whose misses are not measured is monitoring you know nothing about.**
