Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document — the collection, the internal notes and the resolutions are invented for the demonstration. **Every item retained arrives with its reference, its date, its author and the exact passage; every item set aside arrives with its reason. The only point of law cited here — article L. 312-2 of the French code on relations between the public and the administration — is verifiable at source.**

The 34 documents retained

Family	Documents	What each one carries	Origin
Texts and orders	**6**	**Link to the official source, version in force today, publication date**	Légifrance, Official Journal

Family	Documents	What each one carries	Origin
Circulars and instructions	**3**	**Support and date of publication checked — see the box below**	Official bulletins
Internal service notes	11	Date, signatory, quoted passage	Document management system
Council resolutions	9	Number, date, relevant extract	Register of resolutions
Decisions already commented on by the service	**5**	**The decision, the service's original commentary and its date**	The service's catalogue
Total	**34 out of 18,400**	—	**Produced in 4 minutes**

A point that is not documentary caution but law — and it changes what the service can enforce. Article L. 312-2 of the French code on relations between the public and the administration provides that instructions and circulars containing an interpretation of positive law or a description of administrative procedures must be published; those not published on one of the prescribed supports ARE NOT APPLICABLE, their authors cannot rely on them against members of the public, and they are DEEMED REPEALED. Publication of the three circulars retained was therefore checked: two are published, the third is not — and it is cited in 2 of your internal notes. It is better learned here than before the administrative court: both notes are marked « to check » and flagged to their author.

What was set aside, and why — 61 documents

Reason for setting aside	Documents	Retrievable

Outside the geographic scope concerned	**38**	**Yes, with a word**
Text or note repealed	**14**	**Yes — useful when tracing the history of a rule**
Duplicate of an earlier version of the same document	9	Yes
Total	**61**	**Each with its reason and date of setting aside**

The sift is there to be challenged, not submitted to. A document set aside is not a document hidden: **it carries its reason, it stays consultable, and it can be pulled back with a word. What the service cannot do is be unaware that it exists** — and that is exactly what happens when a search returns a list without saying what it left out.
