What the agent does unprompted — and what is logged

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Three actions, all reversible · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three unprompted actions, not one more. Each is withdrawn with a word from the head teacher, effective within the minute.** Everything else waits to be asked.

The three actions

Action	What it does	What it produced	Withdrawal
Nightly comparison of the schemes of work	**Compares the 11 schemes of work with the minutes of the latest team meeting every night and rewrites those a meeting has just changed**	**Substantive rewrites down from 23 % to 3.7 %**	**One word — and the reverse is true: a scheme withdrawn by the team leaves the sequences at the same hour**

Action	What it does	What it produced	Withdrawal
Board preparation page	**Sent to the 18 form tutors 48 hours before their board**	**51 boards started on time out of 54, against 34**	**One word; never leaves the school**
Flagging a subject that is rising	**Warns when a subject triples in a fortnight, with the notice and the message already drafted**	**Year-10 work placement: 340 messages in a fortnight; half-page notice and message to the 118 families written**	One word

What waits for a decision — and who takes it

Act	Who decides	What the agent brings
Mark, progression, guidance	**The teacher and the review board**	**The entries gathered and set alongside**
Report text	**The teacher, then the form tutor**	28 drafts, each with its entries
Letter signed by the school	**The head teacher**	The draft built on the office's template
Answer outside the 11 questions	**The teacher or the office**	The answer drafted and sourced, ready to send
Putting a teaching adaptation in place	**The teaching team**	**The written proposal, with the concept targeted and the exercise where it applies**

Indicators — what is offered, and why

Breakdown	What it shows	What it decides

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

By form and by term	What the school produces for a class	Where to put the effort next term
By subject	Progress in covering the schemes of work	Which team to open next
By channel	Response times held with families	Where to reinforce information
By teacher	**Produced on request of the head teacher, with the three lawfulness conditions already drafted: proportionality, prior information, information of the representative bodies**	**The decision belongs to the head teacher, and it takes ten minutes instead of a file**

> **The mechanism, not the morals:** the day « comments reworked per teacher » becomes a tracked figure, it becomes a target — **people rework for the counter, and the instrument stops measuring teaching and starts measuring the reaction to the counter. One exception, and it is not one: whoever signs is named. A signature is not a counter, it is what makes an act binding.**

Unprompted actions authorised by the head teacher, and review date: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
