Patches by category — 94 % against 6 %

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A patch ready to merge gets merged fast. That is why opening happens by category, starting with the ones the tests adjudicate on their own.**

The open categories, and what makes them openable

Category	Do your tests adjudicate?	Patch produced?
Unused import	**Yes**	**Yes**
Dead variable	**Yes**	**Yes**
Minor dependency bump	**Yes**	**Yes**
Typo in a displayed message	**Yes**	**Yes**
Business rule	**No**	**No — remark**
Public signature	**No**	**No — remark**
Architecture decision	**No**	**No — remark**

> On the open categories, the question "does this patch need reviewing" **has a mechanical answer: the tests pass or they do not.**

The measure that decides whether a category opens or closes

Fate of the patches produced	Share
Merged unchanged	**94 %**
Reworked before merging	**6 %**

The day the second figure rises, **the category closes and the reason is in front of you.**

Why the last three categories stay remarks

A patch there would be **a proposal disguised as an obvious fix** — and it would be merged as such.

For the company to settle

Categories open to patches: _____

Rework threshold above which a category closes: _____ %

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
