Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **An agent that can lift its blocks can lift any of them** — being in a hurry would then suffice to convince it.

Block	Lifted?	By whom	Time
1	Yes	A person	1 hour
2	Yes	A person	1 hour
3	No	—	—
4	No	—	—

Urgency is exactly when people most want to override, and the worst moment to do it. That is why the rigidity applies to this case and to no other.

The notes exist, and that is all the agent was asking for. It was never about preventing the release, but about preventing it going through with nobody having decided.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
