

Forty-one rejections, three reasons

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

312 remarks · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **A zero rejection rate would mean the agent only flags the obvious**, and the obvious has already been seen.

Rejection reason	Remarks
Context the agent did not have	12
Compatibility constraint unknown to it	9
Right, but outside the change's scope	8
Isolated reasons	12
Total	41

A remark that is right at the wrong moment gets the whole review rejected.

It is the most interesting of the three, because the remark is not wrong: it is misplaced.

What the agent does with the third reason

Handling	Done?
Stop flagging it	No
Flag it in the review thread	No
Flag it separately, as "worth considering one day"	Yes

What makes this rate trustworthy — and what a zero rejection rate would be worth

Device	Used?	Why
Say less	No	A zero rejection rate is an admission
Flag only the certain	No	The certain has already been seen

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
