The sovereign framework — where children's data lives, who reads it, what is withdrawn on a word

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Hosting architecture, access log, record of processing activities · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Children's and families' data is hosted in France: an isolated resource under French law, where the AI model is called at its publisher, except with the Sovereign model option, or local inference on a machine belonging to the town. 0 items of data outside the European Union — a fact of architecture, not a contract clause.**

Where the data runs, and what that closes off

Arrangement	Where the data lives	What leaves the network	What it closes off

Local inference	On a machine belonging to the town	**Nothing**	**Any exposure to a third party, whoever it is**
Isolated resource hosted in France	**In France, under French law, dedicated to Vaubrières**	Nothing towards a foreign service	**Cloud Act and FISA 702: exposure reduced by the architecture, documented for the configuration chosen**
Pooling between authorities	—	—	**Ruled out: no shared file, no neighbouring data**

What the assistant reads, what it produces, what it cannot reach

Source	Access	What is drawn from it	Legal basis (GDPR)
Childhood/family file	**Read-only**	Files, enrolments, means-test brackets and their validity dates	**Art. 6(1)(e) — public interest task**
Attendance records	**Read-only**	Meals and sessions actually taken, time-stamped	Art. 6(1)(e)
Catchment map and school calendar	Read-only	The catchment of each school for the September concerned	Art. 6(1)(e)
Individual care plan	**Limited read**	**Existence, validity date, meal regime — the medical content is not read**	**Art. 5(1)(c) — minimisation**
Billing software, family portal	**No write access**	The assistant produces files and drafts; a case officer imports them	—
Families' bank details	**No access**	**No use in preparing an invoice**	**Art. 5(1)(c) — minimisation**

Every read is logged with its date, its purpose and the file concerned; **every output carries the documents it is drawn from**. **Access is withdrawn on a word, and the withdrawal takes effect within the second** — this is not a sales promise, it is an administrative operation your IT department can perform itself and verify straight away.

What you produce on the day of a dispute — the three items

Item	What it contains	Time to produce	What it answers
1 — The line	**Day and time of the attendance record, booking, means-test bracket and certificate date, article of the resolution**	**Immediate**	« Where does this amount come from? »
2 — The validator	**Name of the officer who validated, date and time of validation**	**Immediate**	**« Did the machine decide? » — no: 0 invoices issued without a named validation**
3 — The disclosure	**Record of the AI disclosure made in the first sentence of the exchange**	**Immediate**	**Art. 50(1) of the European AI regulation, applicable since 2 August 2026**
Full access file	Enrolments, bookings, attendance records, invoices, letters, log of reads and their purposes	**One minute**	**Right of access — art. 15 of the GDPR**

On a child's file, the access request comes from a holder of parental responsibility. The log records which one was served, on what date and over what scope — that is the first point a separated parent checks, and it is also the first point on which a department is pulled up when it has recorded nothing. **Over the year, 486 families asked for a human officer rather than the AI assistant, and all 486 got one.**

What the town decides, and what would be regulated if it decided otherwise

Act	Today	If you wanted to automate it	What the assistant brings
Placing a child in a school	**Made by the department and the deputy mayor**	**High-risk system regime — Annex III, point 3 of the European AI regulation**	**The conditions to be met, written, should you decide to**
Granting a waiver	**Decided in panel**	Same regime	Complete file, rule quoted, current roll numbers, comparable decisions
Issuing an invoice	**Validated by the service manager**	Written mandate, capped, dated, withdrawable	Invoices ready, discrepancies isolated, covering letters

Quarterly access review — access rights closed as a result: _____ — held on: _____

Annual review with the data protection officer — set for: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
