Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The assistant states in its first sentence that it is a digital assistant of the body**, the European regulation on artificial intelligence requiring that anyone interacting with an AI system be told so. **The caller can ask for an officer at any moment.**

The rule of answering

On the progress of a file, the assistant says where it stands, what it is waiting for and by what date the decision must be taken; on the outcome, nothing at all. And no medical item is ever given over the telephone, to anyone — not to the insured person, not to their employer, not to a relative: **what is medical goes through the medical service, and the caller leaves with the exact path to obtain it.**

The gain

Measure	Before	With the agent
Unanswered calls	29 %	4 %, and those that remain arrive with the subject noted and the file open
Reply to an e-mail	6 days	Under 24 hours
Medical items given over the telephone	—	0

Twenty-five minutes of reading, once: the twelve answers are written and await the service's approval. **As soon as they are approved the front line answers that same night**, and the record of what went out is handed over each morning.
