Technical framework — partitioning of health data

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Hosting in France, local inference available · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **It describes the architecture actually proposed**: an occupational risks service handles medical certificates, accident circumstances and employment situations. **Partitioning is not a constraint endured: it is what allows a file to be opened to an employer without ever showing them one document too many.**

What the agent sees of a medical item

Element	Accessible to the agent?	Who accesses it
Type of document and date of arrival	**Yes**	The caseworker, to keep the timetable
Site of injuries, diagnosis, medically justified duration	**No**	**The medical service, and it alone**

Element	Accessible to the agent?	Who accesses it
The opinion issued	Yes, as passed on	**A direction, a date, a duration — never a document**

The architecture, point by point

Point	Implementation	What it lets you say
Hosting of medical documents	**A dedicated resource in France; the HDS hosting requirement is settled at scoping, before any go-live**	“Your medical material stays in France, on a resource that is ours alone”
Local inference	**Available for the most sensitive material — computation then happens on a machine belonging to the body**	“Nothing crosses any external network”
Role-based access	**Caseworker: administrative documents · investigator: circumstances · medical service: medical material**	“Nobody sees all three”
Logging	Who asked what, when, and what was produced	**“Here is the named, dated list of who has seen your file”**
General hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	“Your data is processed within the European Union in the architecture chosen”
Write permissions	**Read-only technical account — checkable with one command**	“No entry was made by the machine”

The year's framework measures

Indicator	Year

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Medical documents received	9,400
Access to a medical item outside the medical service	**0**
Documents made consultable outside their addressee's scope	**0 across 1,240 openings of the adversarial stage**
Transfers outside the European Union	**0**
Outputs sent without a person's approval	**0 out of 10,600**

The log can be inspected by your data protection officer whenever she decides, without telling us. This is the document she and your supervising authority will ask for: hosting, data processed, retention periods, who has access to what.

To be settled by the body

Scope entrusted to local inference: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
