> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **The check is on the administrative content, not the layout:** a crooked scan or a photo taken on a building site is handled like the others. **No medical document is opened.**

What is checked on each document

Check	What it prevents
Match with the document expected	The file going back for the wrong reason
Completeness	The certificate with no reference period
Identity of the insured person and the employer	**The document filed in the neighbouring file**
Arrival within the deadline that concerns it	**The point nobody has time to check, and the one that counts on the day of an appeal**

The year's result

Situation	Volume	What is handed to the caseworker
Checked and filed on their own in the right file	**37,720 — 92 %**	Nothing to do: the document is on file
Wage certificates incomplete or unreadable	**1,940**	**Request to redo it written, pointing at the single line to complete, example attached**
Documents with no file reference	860	**790 attached by cross-checking** — two candidate files side by side
Medical documents sent to the administrative service	**480**	**Passed to the medical service without anyone else opening them**
Total received	**41,000**	—

An employer does not send a wrong document out of ill will: he sends it because he was asked for "the certificate". Pointing at the line to complete and attaching the example halves second submissions.

What it gives back to the service

Measure	Before	With the agent
Sorting and matching documents	**Two people half-time**	**Half a day a week**
Document available on file	A few days later	**The day it arrives — therefore before the deadline**
"Did you get my certificate?" calls	**480 a month**	**61**

> **The acknowledgement goes out within the hour** and says what the document completes, what is still missing **and the file's deadline**. It recognises nothing and
