What the agent does alone, and the dry-run exit

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114
Document issued on 09/11/2026

Three actions, four signatures, half a day · fictional document

Fictional document — demonstration example
This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three automatic actions, not one more, each withdrawable with a word** — and a reversibility that is checked before signing a second year, not after.

The three automatic actions

Action	What it does	Its reversibility
Keeping the timetable and the three alerts	**D−15, D−7, D−2 on every deadline**	**A pointless alert goes out as soon as the decision is recorded; a suspended file not entered as such is flagged separately**
Acknowledgement within the hour	What the document completes, what is missing, the deadline	**Recognises nothing — “did you get it?” calls: 480 → 61 a month**

Action	What it does	Its reversibility
Monday record to the service	Files due, adversarial stages not opened, suspended files, documents outstanding	**The only unprompted dispatch, and it goes only to the service**

The four signatures that stay with a person

Act	What the signature brings
Classifying the accident as work-related	**Decided by the authorised officer, on the medical service's opinion**
The notification that follows	It carries the route and time limit for appeal
Charging it to the employer's account	Lasting financial consequences, therefore a human decision
Communication of medical material	**The medical service, and it alone — 0 access outside it in the log**
Over two quarters	**10,600 outputs, 10,600 approvals by a person**

The exit, point by point

Element	What becomes of it	Whose it is
Timetables and index	**Deleted — they held no document content, only dates, types and states**	—
7 years of files	**Have not moved a byte — same systems, same permissions, same filing**	The body

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Element	What becomes of it	Whose it is
12 answers, rewritten templates, discrepancy rule, portal guidance, standard timetables	**Stay in the body's files, readable without us**	**The body**
Production log	Handed over in an open format, or destroyed	**The choice is settled at go-live, not on departure**

No migration on the way in, therefore none on the way out. The national system is not replaced, the employer portal stays yours, no format belongs to us, and no officer has changed how they work other than reading instead of searching.

The dry-run exit

Parameter	Value proposed
Timing	**End of the first quarter**
Duration	Half a day: switch off, check, switch back on
Least costly date	**A Thursday in mid-August — accident numbers are then at their lowest of the year, on your own records**
Protocol	Written, one page

> **Management will know what the promise is worth before committing a second year.** It is the only way to check a reversibility: to do it.

To be settled by the body

Date chosen for the dry-run exit: _____

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
