Rule for files with two initial certificates — as the department wrote it

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document. The rule was proposed by the agent, corrected by the department, then approved on 12/09 by the head of the occupational-risks department. It applies to subsequent files; it does not re-judge any file already examined.

The rule	What it decides
Two initial medical certificates	**The deadline runs from the earlier date**
What the employer sees	**Both dates, from the letter opening the adversarial stage** — correction made by the department
What goes to the medical department	The flagged gap, so that the prevailing date is stated
What stays with the authorised officer	The occupational qualification, and its signature

What makes it reversible

Recorded item	Value
Name of the rule	File with two initial certificates
Date of approval	12/09
Approved by	The head of the occupational-risks department
Originating file	Claim of the 3rd, Mr R.
Withdrawal	**One line in the standard timetable** — the files then come up one by one again

The count of files handled under this rule is given to the department **every month**: a rule that applies without being counted stops being verifiable.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
