Technical framework — where family data lives

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

France, resource isolated per body · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **It describes the architecture actually offered.** A benefits office handles incomes, household compositions and social circumstances: among the most sensitive data any public body processes.

The two deployment modes, for the office to choose

Mode	Where computation happens	What leaves the network	For whom
Local inference	**On a machine belonging to the body**	**Nothing**	Offices with their own server room
Resource isolated per body	On a dedicated server hosted in France	**Nothing outside the European Union**	**No pooling with another office — continuity of service depends on it**

What protects families

Point	Implementation	What the office can state
Training	**No claimant data trains a model**	“What is learned here stays here”
Decisions	**No decision affecting a claimant is automated — no grant, no revision, no refusal, no overpayment notice**	“A public officer signs off every decision”
Encryption	In transit and at rest	“Intercepted data stays unreadable”
Role-based access	**Rights follow the function, not the person**	“Only the staff concerned open a file”
Authentication	Strong, for all access	“No anonymous access”
Logging	Complete, consultations included	“We produce a dated record”
Hosting	**France, under French law, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity**	“Family data does not leave the European Union”

For the most sensitive data, reinforced hosting options exist — **SecNumCloud**, and **health-data hosting** as soon as health information enters a file. **A single architecture is designed to answer both the GDPR and extraterritorial exposure.**

The quarter's measures

Indicator	Value
Data leaving the European Union	**0**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Indicator	Value
Automated decisions affecting a claimant	**0**
Entitlements granted, revised or refused without sign-off	**0 out of 41,000 files processed**
Traced accesses	**All of them**

This document is the raw material for the table of processing operations, retention periods and access by role expected by the office's data protection impact assessment. It is asked for once a year and usually takes three weeks to rebuild; here it is kept up to date continuously.

For the office to settle

Deployment mode chosen (local inference / isolated resource): _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
