

# Delegation of signature — simple write-offs

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Three cumulative conditions, capped, dated, withdrawable · fictional document

## Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

**Fictional document**, produced for the demonstration. **61% of write-off requests go from three weeks to 48 hours**: it is a delegation between public officers, which the AI agent writes, documents and traces in full. *A write-off is the full or partial cancellation of an overpayment in view of the household's situation; an instalment plan spreads the repayment.*

## What the agent prepares for each request

| Item                                           | Source                               | Why it matters                                   |
|------------------------------------------------|--------------------------------------|--------------------------------------------------|
| Household situation at the date of the request | Documents in the file                | Never a declaration alone                        |
| <b>Disposable income</b>                       | <b>Calculated from the documents</b> | <b>It is the figure the committee decides on</b> |
| History of overpayments                        | Benefits system                      | A first overpayment is not handled like a fifth  |

| Item                             | Source                                                          | Why it matters                                                                  |
|----------------------------------|-----------------------------------------------------------------|---------------------------------------------------------------------------------|
| <b>Origin of the overpayment</b> | <b>Office error · late declaration · deliberate concealment</b> | <b>The distinction changes everything, and it is established from documents</b> |
| Reasoned proposal                | <b>Committee scale, quoted and dated</b>                        | The reasoning is written before the decision, not after                         |

## The three cumulative conditions proposed

| Condition                        | Value                       | Reason                                                                       |
|----------------------------------|-----------------------------|------------------------------------------------------------------------------|
| <b>Amount of the overpayment</b> | <b>Below €150</b>           | <b>Below that, examining it in committee costs more than the overpayment</b> |
| Origin                           | <b>No concealment</b>       | Any concealment stays with the committee                                     |
| History                          | No overpayment in 24 months | A recurring household calls for support, not for fast handling               |

## The four limits of the delegation

| Limit               | Value                                                                                  |
|---------------------|----------------------------------------------------------------------------------------|
| <b>Scope</b>        | <b>The three conditions above, and nothing else</b>                                    |
| <b>Duration</b>     | <b>Until 31/12, with a review at expiry</b>                                            |
| <b>Withdrawal</b>   | <b>In a word, with no reason to give, effective immediately</b>                        |
| <b>Traceability</b> | <b>Every decision taken under delegation appears in the committee's monthly record</b> |

## The expected effect, in figures

| Measure | Today | With the delegation |
|---------|-------|---------------------|
|---------|-------|---------------------|

|                                              |                            |                                                               |
|----------------------------------------------|----------------------------|---------------------------------------------------------------|
| <b>Requests meeting the three conditions</b> | —                          | <b>61% of write-off requests</b>                              |
| <b>Turnaround on those requests</b>          | <b>3 weeks</b>             | <b>48 hours</b>                                               |
| Committee time                               | Spread across all requests | <b>Concentrated on the 39% calling for a real examination</b> |

**What the public accountant receives on the day of the decision:** the origin of the overpayment established from documents, the capacity to repay calculated from the file, the proposed schedule and the letter ready. **The movement of funds remains their act, and that is what makes it sound** — what the AI agent gives back is the eleven days they spent rebuilding the file.

### For the office to sign

Cap chosen and expiry date of the delegation: \_\_\_\_\_

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
