The sovereign framework — where families' data lives, who reads it, what is withdrawn on a word

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Hosting architecture, access log, chain of evidence for a reclamation · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Families' data is hosted in France: an isolated resource under French law, where the AI model is called at its publisher, except with the Sovereign model option, or local inference on a machine belonging to the municipality. 0 items of data outside the European Union — a fact of architecture, not a contract clause.**

Where the data runs, and what that closes off

Arrangement	Where the data lives	What leaves the network	What it closes off

Local inference	On a machine belonging to the municipality	**Nothing**	**Any exposure to a third party, whoever it is**
Isolated resource hosted in France	**In France, under French law, dedicated to Bellemont-sur-Vère**	Nothing towards a foreign service	**Cloud Act and FISA 702: exposure reduced by the architecture, documented for the configuration chosen**
Pooling between municipalities	—	—	**Ruled out: no shared register, no neighbouring data**

The distinction that shapes everything else

Data	Within the GDPR?	Basis	What the department does with it
Name, dates and plot of a deceased person	**No**	**GDPR recital 27: the regulation does not apply to the data of deceased persons**	**Preserved for the long term — that is the register's reason for existing**
Contact details of the grant holder and their successors in title	**Yes, in full**	**Living persons — art. 6(1)(e), public interest task**	**Minimised, logged, purged once no file has any use for them**
Directions left by a person on what becomes of their data after death	**Provided for by French law**	Data Protection Act	**Flagged on the record concerned as soon as they are received, rather than left in a letter**

What the assistant reads, what it produces, what it cannot reach

Source	Access	What is drawn from it	Legal basis (GDPR)
Register of grants	**Read-only**	Grants, terms, expiries, known successors in title	**Art. 6(1)(e)**
Maps of the three cemeteries	Read-only	Plots, paths, rows	Art. 6(1)(e)
Signed grant deeds	**Read-only**	Dates, terms, particulars, named successors	Art. 6(1)(e)
Bound registers 1874-1978, digitised	**Read-only**	Indexing, with the link to the original image	Art. 6(1)(e)
Cemetery management software	**No write access**	The assistant produces a correction file; the officer imports	—
Revenue office, bank details	**No access**	**No use in preparing a deed**	**Art. 5(1)(c) — minimisation**

Every read is logged with its date, its purpose and the record concerned; **every output carries the documents it is drawn from**. **Access is withdrawn on a word, and the withdrawal takes effect within the second** — an administrative operation your IT department can perform itself and verify straight away.

The chain of evidence for a reclamation — five items, in this order

Rank	Item	What it establishes	Source
1	**The grant deed and its date**	**The thirty years required before the procedure may begin**	**Art. L. 2223-17 of the general local authorities code**
2	**The date of the last interment**	**The ten years required since the last interment**	**Art. L. 2223-17**

Rank	Item	What it establishes	Source
3	**The first record of abandonment, its notification and its public display**	**That the successors in title were put in a position to react**	**Art. L. 2223-18**
4	**The second record, three years after the first**	That the state of abandonment persists	**Art. L. 2223-18**
5	**The town council's resolution and the mayor's order**	**That the decision is the authority's, and the authority's alone**	Register of resolutions

A file missing any one of these five items does not advance. Of the 24 files in progress, 4 were taken out of the queue for that reason — no trace of notification or public display on file. **This is not a delay imposed on the department: it is what the department would have lost, and a family that would have learned of it through litigation rather than by letter.**

What is produced on the day of an access request

Item	Contents	Time to produce	Basis
Full access file	Grant, deeds, letters exchanged, contact details held, log of reads and their purposes	**One minute**	**Art. 15 of the GDPR**
Record of the AI disclosure	**Made in the first sentence of every exchange**	**Immediate**	**Art. 50(1) of the European AI regulation, applicable since 2 August 2026**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Item	Contents	Time to produce	Basis
Requests for an officer of the service	**312 over the year, 312 served**	Immediate	Transfer log

Quarterly access review — access rights closed as a result: _____ — held on: _____

Annual review with the data protection officer — set for: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
