Grant campaign — 27 applications pre-assessed

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

21 complete with a proposed band, 6 missing-document letters · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The families named are invented and no amounts are reproduced:** the proposed band results from the national scale for the campaign, in the version published in the official bulletin, applied only to values read in the documents filed. **The award remains the decision of the competent authority — Article 22 of the General Data Protection Regulation.**

The 27 applications of the week

Status	Applications	What is ready	What is left to the business office
Complete	**21**	**Proposed band, calculation printed line by line, source document alongside**	**A 5-minute check, then forwarding**

Status	Applications	What is ready	What is left to the business office
Incomplete	6	Letter drafted naming the document, what to send back, where to file it and the deadline	A read-through and a signature
Total	27	—	2 h 15 instead of 13 h 30

Four files, exactly as they are put up

Family	Status	What the page carries	What was read, and where
Bertoli family	Complete	Proposed band: 3. The calculation follows the order of the campaign scale — income taken into account, dependants, charge points, band	Tax assessment for the expected year, boxes reproduced one by one · composition declaration signed on 12 September
Nguyen-Delorme family	Complete, with a flag	Proposed band: 5. Flagged in plain sight: the band in the previous campaign was 3, the gap comes from a change in income	Tax assessment · previous campaign's assessment, values set side by side
Ouattara family	Complete, decision pending a conversation	No band proposed: an end-of-contract certificate dated 3 October, later than the assessment, is on file. The question is asked, not guessed	Tax assessment · certificate of 3 October, flagged at the head of the file

Family	Status	What the page carries	What was read, and where
Marchetti family	**Incomplete**	**Letter drafted: « your tax assessment reached us as the first page only; pages 2 and 3 are required »**	**Tax assessment, 1 page received out of 3 stated**

> **Not one line of the calculation is the agent's:** each points back to the document and the box where it was read. **The calculation can be redone by hand in two minutes on the campaign scale, and that is exactly the point — a family who contests contests figures they can check.**

The time a file takes, before and after

Step	Share of the time	By hand	With the agent	What is left to the business office
Pre-assessment — read the documents, take the values, apply the scale	**60 %**	**30 min**	**5 min**	**Check a printed calculation**
Check, conversation where needed, forwarding	40 %	20 min	**20 min — unchanged**	**That is the job, and it does not move by a minute**
Total per file	**100 %**	**50 min**	**25 min**	**Pre-assessment goes from 60 % to 10 % of the file's time**

Over the 486 files in the year, that is 202 hours given back to the business office — more than five weeks of work on the statutory basis of 35 hours. And the peak week, the one with 132 files, goes from 66 hours of pre-assessment to 11 hours.

The figure the agent publishes about itself — and what it did about it

Batch	Files pre-assessed	Bands corrected by the business office	Measured cause
First batch	**132**	**29 — 22 %**	**24 out of 29: a document dated after the tax assessment was on file, and the agent read the assessment without seeing it**
Second batch	**148**	**7 — 4.7 %**	**Situations only a conversation with the family could settle**

The fix is an action, not a promise: any document dated after the tax assessment is flagged at the head of the file, **and no band is proposed without it having been put on the table. That is what took corrections from 22 % to 4.7 %.**
