What the agent does alone, and the dry-run exit

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Three actions, five signatures, half a day · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **Three automatic actions, not one more, each withdrawable with a word** — and a reversibility that is checked before signing a second year, not after.

The three automatic actions

Action	What it does	Its reversibility
Check before requesting a document	**The request does not go out if the document is already filed and valid**	**A document reaching expiry surfaces on its own and the request goes out, dated and justified**
Acknowledgement within the hour	What the document completes, what is still missing	**Opens no entitlement — “did you get my papers?” calls: 610 → 74 a month**

Action	What it does	Its reversibility
Monday record to the service	Files ready to decide, documents outstanding, files with no movement, confirmed flags	**The only unprompted dispatch, and it goes only to the service**

The five signatures that stay with a person

Act	What the signature brings
Opening or refusing an entitlement	**A reasoned, dated decision**
The notification that follows	It carries the route and time limit for appeal
Contributions instalment plan	It commits the fund over time
Award of a grant	A collective decision, comparable to earlier ones
Communication of medical material	**The medical service, and it alone — 0 access outside it in the log**

The exit, point by point

Element	What becomes of it	Whose it is
The document index	**Deleted — it held no document content, only what is needed to know one existed**	—
8 years of files	**Have not moved a byte — same systems, same permissions, same filing**	The fund
16 answers, rewritten templates, inconsistency rule, conditions of each benefit	**Stay in the fund's files, readable without us**	**The fund**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Element	What becomes of it	Whose it is
Production log	Handed over in an open format, or destroyed	**The choice is settled at go-live, not on departure**

No migration on the way in, therefore none on the way out. The four branch systems are not replaced, no format belongs to us, and no caseworker has changed how they work other than reading instead of searching.

The dry-run exit

Parameter	Value proposed
Timing	**End of the first quarter**
Duration	Half a day: switch off, check, switch back on
Least costly date	**The second Tuesday after a contributions due date — the clearest lull of the year, on your own records**
Protocol	Written, one page

> **The board will know what the promise is worth before committing a second year.** It is the only way to check a reversibility: to do it.

To be settled by the fund

Date chosen for the dry-run exit: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
