Document issued on 09/11/2026

12.8 % → 1.9 % after reconciling notified decisions · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This is the figure the agent publishes about itself, and it is better that it come from the agent than from someone reading their payslip. None of those simulations reached a payslip: they were all caught at the officer's check, which is there for exactly that.**

The first quarter

Measure	Value	Share
Simulations produced	**290**	100 %
Corrected before going into pay	**37**	**12.8 %**
of which out-of-date situation in the information system	**31**	**84 % of the corrections**
of which retroactive adjustments with two decisions	6	16 % of the corrections
Reaching a payslip	**0**	**The officer's check caught them all**

It was not a calculation error: the agent was calculating correctly, on an out-of-date situation — a part-time granted by decision and never entered, a return from career break dated a month earlier. **The cause sat in how fresh the data was, not in the calculation** — which is why it is corrected once and for all.

What was done

Measure	Effect
Every simulation reconciled with the last notified individual decision	**Before any calculation**
Where the two diverge, no calculation is produced	**The gap is handed to the officer with both documents side by side**
Alert on any notified decision not entered within ten days	**It addresses the cause rather than the symptom**

The following quarter

Measure	Quarter 1	Quarter 2	Change
Simulations produced	290	310	—
Corrected before going into pay	**37 — 12.8 %**	**6 — 1.9 %**	**−31**
of which out-of-date situation	31	**1**	**The cause has gone, not merely the symptom**

The rule that holds everything else — ask rather than infer

Situation	What the agent hands over	What it gives
A working time cannot be found	**What is missing, where it looked, who holds it — and the request already drafted**	**74 missing values, 74 requests prepared, 68 answers within five days**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Situation	What the agent hands over	What it gives
Length of service is uncertain	The absence flagged, with a pointer to the orders in the file	**An inferred value would be indistinguishable from a read one**
Two decisions overlap	**Both documents side by side, with no calculation**	**That is what makes 1.9 % a figure you can rely on**

The protection that matters to staff

Indicator	Two quarters
Outputs prepared	**1,460**
Approved by a person before sending	**1,460**
Individual decisions taken without the authority's signature	**0**
Corrections made before sending	**43 out of 43**
Corrections made after sending	**0**

> **That is exactly what checking is for, and why it is not negotiable.** On pay, an inferred value is indistinguishable from a read one — **and that is what would make everything else unusable.**

For the establishment to settle

Chosen frequency of the corrected-simulations record: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
