Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The review is presented in hours returned to control, not hours saved. A registry is not judged on its speed: it is judged on what it has verified.**

Where the 171 hours come from

Item	Page benchmark	Before → after	Monthly volume	Hours returned
Set of documents and notification	**60 % → 10 %**	**3 h 10 → 32 min**	45	**118 h**
Case summary for review	**40 % → 10 %**	**48 min → 12 min**	70	**42 h**
Monthly deadline count	**100 % → 20 %**	**14 h → 2 h 48**	1	**11 h**

Item	Page benchmark	Before → after	Monthly volume	Hours returned
Total				**171 h a month**

What those hours became

Measured effect	Value
Effective checking time per file	**+44 %**
Missing documents discovered late	**41 last year → 9 flagged at recording this quarter**
Register anomalies cleared	**17 within five days, instead of several weeks**
Real divergences caught on situations under thirty days	**2**
Time from « doubt » to « the registry can rule »	3 h 40 → 20 minutes

> **The two divergences caught under thirty days are the outcome everything else exists to produce.** The time returned matters only because it funds that checking.

Human supervision and traceability

Measure	Value
Entries made by a named officer	**4,190 out of 4,190**
Entries without an author	**0**
Decisions with a legal or significant effect taken by an agent	**0**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
