Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The schedule is regenerated at every document recording. A schedule that is always current beats a perfect one produced three weeks later** — and it costs nothing more.

What each line carries

Column	Content	Why it is there
Sequence number	Order of receipt at the registry	A reference citable in any document
Nature of the document	**As the establishment's filing plan names it**	**One nomenclature, whichever court sent it**
Origin	Issuing court or service	Knowing who to ask again
Date of issue	Shown on the document	Consistency check

Column	Content	Why it is there
Date of receipt	Recording at the registry	Consistency check
Officer who recorded it	**By name**	**Chain of the register**

The three checks run at generation

Check	What it detects	File 2417	This month
Completeness	Documents referred to by another and absent	**1**	**9**
Date consistency	**Document received before it was issued — a keying error**	0	4
Duplicates	Same document, two records	0	3

What it changed on missing documents

Measure	Last year	This quarter
Missing documents discovered late	**41**	**—**
Missing documents flagged at recording	—	**9**
Detection time	When the document was needed	**Within five days of receiving the document that referred to it**

> **It is not the same job to look for a document you have known was missing for a month, or to look for it on a Friday evening when a deadline falls on Monday.** The gain is not only time: **it is the disappearance of the emergency.**
