Local inference — what never leaves the network

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Verifiable by your own teams · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **Local inference means the model computes on the establishment's machine: the content of a document crosses no external network to be read. It is not a setting — it is how the installation is built.**

What is guaranteed, and how to verify it

Guarantee	Scope	Who can verify it
0 external calls	**No outbound route for document processing**	**The establishment's own information security officer, on their own network log**
0 data outside the European Union	**And for good reason: 0 data outside the building**	Same finding

Guarantee	Scope	Who can verify it
Architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	**No host, even a European one, can offer this once it belongs to a group subject to US law**	Contractual chain
No data trains a model	Every document read	Contract clause and log
Encryption at rest	All documents	Installation acceptance
Role-based access	**An officer assigned to deadlines does not open documents of files they are not responsible for**	Tested role by role
Logging of every access	Who opened what, when	Access log

What local inference costs — said plainly

Constraint	Local inference	Isolated resource hosted in France
Machine inside the establishment	**Required**	No
Technical room	**Required**	No
Model updates	**On site**	Remote
Cost	**Higher**	Lower
Legally sufficient	Yes	**Also yes**

> **It is the only place in the catalogue where the more expensive option is recommended:** with criminal situations, **the question « where is the data » must not call for an explanation.** An answer that fits in one word beats a legally accurate demonstration.

What is proposed

Action	By whom	Why
Verification that there is no outbound route	**The establishment's information security officer**	**A guarantee only the supplier asserts is not worth the one the client has verified**
Finding added to the compliance file	Facility director	Document requested at inspection

Information security officer's finding, date: _____

> **Request a demo with your own documents**
>
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
