Control recount — 14 flags

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Documents compared with one another · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **A flag is not a finding: it is a request for verification addressed to a registry officer.** The AI agent compares written records with one another; **it never says which date is the right one.**

The four families of cross-check

Family	What is compared	What is raised	Number this month
Same item, two sources	A date appears on a decision received and on the case sheet	**Both entries, each with its reference**	**7**
Gap between two dates in the same file	**The number of days recounted, compared with what the document itself states**	**The gap, with no conclusion**	**3**

Family	What is compared	What is raised	Number this month
Document referred to and absent	A document referred to by another and not recorded	The referring document and the missing one	3
Duplicate	Same document, two records	Both records	1
Total			**14**

Example flag — file 2401

Source	Wording copied	Reference	Date of receipt
Decision received	**Wording on the document, copied word for word**	Document no. 9	Recorded in the schedule
Case sheet	**Wording on the sheet, copied word for word**	Sheet, register entry	—
Gap recounted	**The two entries do not match**	—	—
Agent's conclusion	**NONE — verification belongs to the registry**	—	—

What the registry's verification gave on the 14

Item	Value
Flags raised	14
Real divergences	**11**
Flags explained on verification	**3**
What explains them	**Documents from an older generation of forms carry the date in abbreviated form; two entries for the same day do not take the same shape there**

Item	Value
What was done with it	**Older forms now matched in their expanded form, the three documents re-read with the officer who cleared the flag**
Real divergences on situations under thirty days	**2**

> **The flagging threshold belongs to the registry.** Wide setting: more false alarms, no missed divergence. Tight setting: less noise, **and acceptance of missing more. The agent does not take that decision: it sets it out and applies it.**

What flagging shifts

Step	Before	After
From « there is a doubt » to « the registry can rule »	**3 h 40**	**20 minutes**
Divergences resolved the same day	—	**9 out of 11**
Divergences requiring a document from a court	—	2

Flagging threshold chosen, and date of the decision: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
