Prescription completeness — 214 out of 2,240, and the prepared request

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Check of the four elements required by article R4311-7 of the French Public Health Code · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The check bears on the PRESENCE and the LEGIBILITY of the four elements, never on the medical content of the prescription. No missing element is completed by the agent, and no dose is inferred: article L4161-1 of the French Public Health Code reserves establishing a diagnosis and treating illness to the physician.**

The four elements checked

Element required by art. R4311-7	What the agent checks	What it never does
Written	The document exists and is tied to the resident and the prescriber	**Reconstruct an oral prescription**

Element required by art. R4311-7	What the agent checks	What it never does
Qualitative	The product or the nature of the act is named and legible	**Choose between two readings of an illegible name**
Quantitative	Dose, form, frequency and duration are present and legible	**Write a dose, infer it from an earlier prescription, or « correct » it**
Dated and signed	The date is present and legible, the signature identifies a prescriber	**Date or identify a signatory by inference**

The year's 214 incomplete prescriptions

Missing or illegible element	Number	Share of the 214	Time to put right, before / after
Incomplete quantitative detail — dose or duration	**96**	**44.9 %**	**6 days → 1 day**
Undated or illegible date	**61**	**28.5 %**	**6 days → 1 day**
Prescriber signature not identifiable	**34**	**15.9 %**	**5 days → 1 day**
Illegible on at least one item	**23**	**10.7 %**	**8 days → 1 day**
Total	**214**	**100 %**	**6 days on average → 1 day**

The request to the prescriber — the template, settled by the nurse coordinator

Section of the request	What it contains	Why

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Prescription reference	Unit sequence number, date received, arrival channel	The prescriber finds their document in ten seconds
Resident concerned	Name, date of birth, unit	**Strictly necessary to continuity of care — art. L1110-4**
The missing element, named	« Duration of treatment missing », « date illegible »	**A precise request is handled in a minute; a vague one is put off**
Image of the area concerned	The fragment of the document, not the whole document	**Minimisation: the prescriber only needs that area**
The field left blank	**The answer — the element only the prescriber can write**	**Art. L4161-1**

Nothing goes out without validation: the request is **prepared**, the nurse rereads and validates it, **and only then does it go out over secure health messaging. Over the year, 214 requests prepared, 209 validated and sent, 5 set aside by the nurse** — in all five cases the missing detail was on a second document received the same day that the agent had not matched. **Matching of documents received the same day was added on 14 September.**

Template request to the prescriber settled by the nurse coordinator, on: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.
