The order of a round — seven residents and the constraints that govern it

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

The 7 a.m. nursing round, and the 41 constraints learned from the resequencings · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This order is a PROPOSAL: the order actually followed is decided on the nurse's clinical assessment, which is part of their own scope of practice — articles R4311-3 and following of the French Public Health Code. No prescription time is calculated or changed by the agent: it is carried over from the current prescription, with its date and its signatory.**

The proposed order, and the constraint governing each position

Order	Resident (fictional)	Care	Constraint governing the position	Source of the constraint
1	Mr Vasseur, rm 108	Insulin injection	7.30 a.m., fixed time before breakfast	Prescription of 4 February, Dr Mareuil

Order	Resident (fictional)	Care	Constraint governing the position	Source of the constraint
2	**Mrs Aubin, rm 121**	**Insulin injection**	**7.40 a.m., fixed time before breakfast**	**Prescription of 21 January, Dr Mareuil**
3	Mr Delaunay, rm 116	Blood sample	**Fasting, sample at 8.15 a.m.**	Test request of 8 March
4	Mrs Roussel, rm 203	Nursing care	**Finished by 9 a.m. — transport to an outpatient appointment at 9.30**	Outpatient appointment letter
5	**Mrs Ferrand, rm 214**	**Complex dressing**	**22 minutes on average over the last six renewals — placed after the fixed-time care**	**Actual durations recorded in the file**
6	Mrs Chaumont, rm 205	Monitoring and routine care	No time constraint	Care plan
7	**Mr Perrin, rm 118**	**Care in the isolation room**	**Last**	**The unit's infection-control protocol of 12 January**

The costed item

Before	After	Unit gain	Annual volume	Hours returned
16 min of preparation, of which 4 min 48 sequencing constraints — 30 %	**1 min 17 — 8 %**	**3 min 31**	**1,460 rounds**	**85 h**

The year's 508 resequencings — and the 41 constraints they revealed

Constraint learned	Resident (fictional)	Times it appeared	Carried into the care plan
Refuses care before 8 a.m.	**Mr Ancel, rm 112**	**27**	**Yes, on 18 May**
Care better accepted after the 9 a.m. physiotherapy	**Mrs Roussel, rm 203**	**19**	**Yes, on 18 May**
Ten minutes of protective clothing counted as four in the plan	**Room 118**	**34**	**Yes, on 2 June**
38 other stable constraints	Various	**From 5 to 22 times each**	**Yes, in quarterly batches**
Measured effect	—	—	**Resequencings 34.8 % → 22.1 % of rounds**

The 22.1 % that remain are what they should be: clinical, not organisational. A round plan that was never changed would be the sign that the nurse had stopped reassessing — which is exactly the result nobody wants.

Constraints carried into the care plan by the nurse coordinator, on: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
