Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No note is rewritten or withdrawn.** A stale note stays visible and stays marked as such: it carries the history of the reasoning, which is often more useful than the conclusion.

Note	Date	Author still on the team	Component mentioned	Still exists?	Choice still applied
ADR-014	09/2023	**No**	Reconciliation screen	**No**	**Yes**
ADR-007	03/2023	**No**	Message queue v1	**No**	**Yes**
ADR-019	01/2024	Yes	Third-party auth service	**No**	**Yes**
ADR-004	11/2022	Yes	Former customer portal	**No**	No
ADR-022	05/2024	Yes	Shared Redis cache	**No**	No

Note	Date	Author still on the team	Component mentioned	Still exists?	Choice still applied
ADR-011	06/2023	Yes	Nightly batch	**No**	No
ADR-027	09/2024	Yes	Legacy SMS gateway	**No**	No

Three of the seven govern a choice still applied today. Those are the ones that matter: the other four describe rules that are no longer applied, which is a documentation defect rather than an architecture one.

What would be matched, on your approval

Trigger	Action	Recipient	Chase
Removal of a component named in a note	Flagged	Author, or technical lead if the author has left	15 days
Quarter ended	Report of notes whose premise no longer holds	Technical lead	—

Two of the seven authors have left the team. That is exactly where written memory serves most — and where it ages without anyone noticing.

What the agent flags, and what stays with the team

Action	Performed?
Mark a note "premise to review"	**Yes**
Attach the PR that removed the component	**Yes**
Rewrite a note	**No**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
