Exposed key — steps to follow

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

4 ordered steps · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No key value is reproduced here, not even truncated.** This document is made to circulate; a key is not.

What is established

Item	Finding
Date it appeared	01/08/2026 at 16:42
Commit	a3f91c, branch feat/export-csv
Removed from the file since?	Yes, in a later commit
Still in history?	**Yes**
Repository visibility	**Private**
Key still valid?	**Yes**
Service concerned	Transactional email
Services using it	**2**

> **The repository is private: the exposure is internal.** That is not nothing — history stays readable by every access to the repository, including former ones — but the scale is not that of a public leak, and it changes the order of the steps.

The order, and why it matters

#	Step	Who	Why not earlier
1	Create the new key	Technical lead	—
2	Deploy it to both services	Technical lead	Revoking first stops order confirmation emails
3	Verify a real send	Technical lead	A deployed key is not a working key
4	**Revoke the old one**	Technical lead	**Only now**

> **Revoking first is the reflex, and it is the wrong order.** On this service it stops order confirmation emails — a visible customer incident, caused by the fix rather than by the mistake.

The two services concerned

Service	Environment variable	Restart needed?
api-orders	MAILER_API_KEY	No — re-read at runtime
worker-notifications	MAILER_API_KEY	**Yes**

What remains, afterwards

Purging repository history: ☐ to be scheduled · ☐ not pursued · **decided by:** .....

Purging shared history forces every clone to resynchronise. It is scheduled with the team; it is not urgent once the key is revoked, and it is not optional for all that.

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
