Release 2.14 — prepared

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

6 PRs · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Nothing is merged, nothing is deployed.** The file is ready; the button stays with the team.

The six pull requests

PR	Subject	Approved	Up to date	Tests	Migration	Reversible
#511	Filters on the customer list	Yes	Yes	Green	No	—
#514	CSV export fix	Yes	Yes	Green	No	—
#516	Breadcrumb rework	Yes	Yes	Green	No	—
#517	Access logging	Yes	Yes	Green	No	—
#518	40 labels translated	Yes	Yes	Green	No	—

PR	Subject	Approved	Up to date	Tests	Migration	Reversible
#519	Invoice model cleanup	Yes	Yes	Green	**Yes**	**No — dropped column**

> **PR #519 is correct and approved.** The point is not its quality: it is that a dropped column does not replay backwards. Deployed with the other five, it deprives the whole release of a simple rollback.

The proposed split

Batch	PRs	Rollback	Estimated duration
1	511, 514, 516, 517, 518	**Simple**	≈ 6 min
2	519 alone	**Restore from backup**	≈ 3 min

Six more minutes in total, and a simple rollback on five PRs instead of none. That is the kind of call that no longer arises once the deployment has started.

What else is ready

Item	State
Release note	**Written from the 6 PRs**
New environment variables	**2, listed with expected values**
Post-deployment checks	**7 points, in order**
PRs merged	**Not done**
Deployment	**Not triggered**

---

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
