Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The matching covers the content of the documents** — amount, date, issuer, description of the service — **and not the file names, which never say anything.**

What the matching gave

Situation	Files	Amount	What is done with it
Same expenditure presented to two schemes	47	€128,400	All assembled, with the documents
of which an applicant's mistake	31	—	Two counters of the same authority, a rulebook that does not clearly say the schemes do not combine on the same expenditure
of which a permitted and regular combination	11	—	Set aside by the agent, with the rulebook that allows it

Situation	Files	Amount	What is done with it
of which files calling for examination	5	—	Handed over with both files, both invoices and the chronology

The decision to withdraw a grant or to ask for repayment belongs to the competent authority. What the agent hands over is a file that stands up after five minutes of reading before the public accountant.

The most effective correction is not a check

Measure	Expected effect	Status
Missing sentence in the leaflets: schemes do not combine on the same expenditure	Treats the 31 applicant mistakes at source	Written, ready for the 21 leaflets
Matching at every filing rather than once a year	9 double presentations detected at filing over the trial quarter, corrected by the applicant themselves	No letter, no control, no dispute

What it represents

Reading	Figure
Public spending funding additional projects instead of funding 47 twice	€128,400
Scope of the check	The 6,400 files, not the ones there was time to look at

For the department to settle

Action on the 5 files calling for examination: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
