Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Three automatic acts, not one more, each withdrawable with one word.** Everything else waits for a request.

The three automatic acts

Act	When	Reversibility
Completeness check on every file filed	Overnight after filing	A document removed from a file disappears from the indexes at the same hour
Writing the updated version of a rulebook amended by resolution	The day after the session	It is the act that took substantive corrections from 8.1 % to 1.1 %
Weekly record to the head of department	Every Monday	The only unprompted send

The four decisions that stay with the public official

Decision	What the agent prepares	What the signature brings
Awarding a grant	Criteria ticked, scale applied, reasoning written	A decision reasoned, dated, traced and open to challenge
Refusing an application	Criterion not met quoted in plain terms, other eligible scheme flagged	Same
Withdrawing a grant	Chronology, documents alongside	Same
Asking for repayment	Breakdown, file ready for the public accountant	Same

A decision with effects on an applicant never rests on automated processing alone. It is taken by the competent public official — **and a decision nobody had signed could be challenged by nobody, so it would be worth nothing before the administrative court.**

The exit, verifiable before the vote

Item	The day the authority stops
The agent's indexes	Deleted — no file inside
Log	Handed over in an open format or destroyed, at the authority's choice
21 restored and dated rulebooks, 13 answers, easy-read versions, rewritten checks	Stay with the urban community
Dry-run exit	Half a day at the end of the first quarter — first Friday of August, 11 filings against 26 on average

For the department to settle
