Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. *Non-take-up is when a person or an association meets the conditions of an entitlement without ever claiming it.*

Detection relies solely on applicants already known to the authority.

What the matching gave

Stage	Volume	Reading
Applicants eligible for a grant never claimed	890	610 households on the renovation grant, 280 associations on the running grant
Letters sent, after management's decision	890	Estimated amount, 3 documents to enclose, direct filing link
Files filed	520	58 % of the letters
Grants awarded	431	Assessed by the officers, decided by the competent authority

Stage	Volume	Reading
Files complete on arrival	91 %	Because the letter named the documents — 12 minutes of pre-assessment instead of 45

What it says about a scheme

Finding	Figure
Filing rate among households eligible for the renovation grant	31 % → 58 % in a year
Criteria changed to achieve it	None

A scheme that does not find its public is not necessarily a bad scheme: it is often a scheme its public does not know about. **It is the strongest argument to put to elected members wondering why an envelope is under-spent.**

The rhythm proposed

Rule	Reason
Detection rerun every quarter	A non-take-up situation arises from a change in circumstances or a new scheme
Letters sent in waves of 200	So that the twelve officers absorb the filings generated

For the department to settle
