Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The figure is published by the agent itself**, with its measured cause and the correction that followed.

The figure, over two quarters

Quarter	Notes produced	Corrected on the substance	Rate
First	312	**44**	**14.1 %**
Second	331	**12**	**3.6 %**

The cause, measured and not supposed

Origin	Corrections	What had happened

7 municipalities under national rules and 3 rulebooks not up to date	**26 out of 44**	**The text applied was no longer the right one — it was not an error of judgement**
Site judgements	**18 out of 44**	**Fitting into the landscape, intervisibility — only a visit settles them**

Municipalities without a local planning document fall under the national planning rules, which read very differently from a local plan: those are other rules, and it is not the same reasoning.

What the agent did with it

Correction	Reach	Measurement made before proposing
3 missing updates incorporated	The rulebooks concerned	**Every rulebook now carries the resolution that adopted it and its date**
Carrying over every voted amendment	**The night that follows the transmission of the resolution**	**The cause can no longer rebuild itself**
Reading template for the national rules	7 municipalities	**Run over the 96 files of those municipalities across two years: 89 would have received the analysis finally retained**

The rule that holds the figure

Situation	What the agent does	Result of the quarter
Dimension missing from a plan	**Requested, never assumed compliant**	**118 requests prepared, 104 answers back within eight days**
Easement not found	Requested, never assumed absent	—

Situation	What the agent does	Result of the quarter
Value not read	**Never written: what is missing, where the agent looked, who holds it**	**That is what makes 3.6 % a figure to rely on**

The protection of the signature

Indicator	Over two quarters
Notes approved by an officer before the decision went out	**643 out of 643**
Corrections made before sending	**56 out of 56**
Corrections made after sending	**0**

> **The 18 site judgements become a list of points to check on site**, written and submitted to the service: **9 of the 12 corrections of the second quarter already fell within it.** A note that says “this point is judged on site” sends the officer to the right place with the file already built — that is where his eye decides.

For the service to settle
