Three reversible acts, four human signatures · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **Only three acts are automatic**, and each is withdrawn with a word. Everything else waits for a request.

The three automatic acts

Act	Trigger	Reversibility
Calculation and monitoring of due dates	**Every filing**	**Alert at D−10, list on Monday; as soon as a decision is signed, the file leaves the list at the same hour**
Carrying over planning document amendments	**Transmission of a resolution by a municipality**	**Updated version placed awaiting reading — it is this act that took corrections from 14.1 % to 3.6 %**

Act	Trigger	Reversibility
Weekly summary	Every Monday	**Files lodged, deadlines within a fortnight, opinions awaited, incomplete files — sent to the head of service alone**

The four acts that stay with a person

Act	Who	Why that is what gives it its value
Decision and signature	**The municipality's mayor**	**It is that signature that makes the permission challengeable before the court, therefore defensible**
Assessment opinion	The case officer	The judgement is his; the note prepares it
Formal request for further documents	**The competent authority**	**It produces its effect on the deadline**
Choosing between two contradictory values	**The case officer**	**With the named document in support — that is what reasons the decision**
Total over two quarters	—	**643 files, those four acts performed by a person without exception**

The way out, if the service stops

Element	What happens to it
Index	**Deleted — it contained no file document**
Analysis log	Handed over in an open format, or destroyed — at the service's choice
Indexed rulebooks, reasoning template, answers, inconsistency checks, grant grids	**Stay with the service, readable without us**

Element	What happens to it
Assessment software and filing platform	**No migration in, therefore none out**
Dry-run exit	**At the end of the first quarter, half a day — protocol written on one page, first Friday of August: 3 filings on that day on average against 19 on a Monday in March**

> **No statutory deadline expires in silence:** every file carries its date, the alert falls ten days ahead, and the reasoned draft decision waits for the signature before the deadline runs out. **That is the rule that holds all the rest.**
