Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Every precedent is surfaced with the version of the regulations in force at the date of its decision.** Without that, a cited precedent may rest on repealed wording.

Version	In force from	To	Files assessed under it
Original	01/2019	13/09/2022	**412**
Amendment 1	14/09/2022	07/03/2024	**318**
Amendment 2	08/03/2024	19/01/2025	**241**
Amendment 3	**20/01/2025**	**in force**	**209**

412 of 1,180 files were assessed under a version now repealed. They remain useful precedents — provided you know which text they were decided under.

What the 2022 amendment changed, clause A 2

Before 14/09/2022	Since 14/09/2022
Only buildings **necessary to the agricultural holding** are permitted	In addition, **extensions and outbuildings to existing dwellings** are permitted, within limits of area and siting set out in the regulations

What the agent does as a matter of course

Action	Performed?
Attach to every precedent the version in force at its date	**Yes**
Flag whether the text has changed since	**Yes**
Discard a precedent that has become unusable	**No — it is flagged, not removed**
Interpret the scope of an amendment	**No**

A precedent based on repealed wording is not worthless: it tells you how the service reasoned. It becomes dangerous only when nobody knows it rests on wording that no longer exists.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
