

Thirty-one surviving confidentiality clauses

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

214 contracts · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No clause is sorted into "good" or "bad"**. A ten-year clause can be excellent in one contract and absurd in another, depending on what the contract protects.

Situation	Contracts	Share
Clause with explicit survival	31	14%
Clause with no explicit survival	68	32%
No confidentiality clause	115	54%
Total	214	100%

The 31, by survival period

Period provided	Contracts
2 years	9
3 years	11

Period provided	Contracts
5 years	5
10 years	2
Without limitation of duration	4

The 4 "without limitation of duration" are flagged because their drafting differs from the other 27, not because they would pose a problem. The agent does not say whether such a clause is valid or enforceable.

What is provided for each of the 31

Element	Provided?
The contract	Yes
The article	Yes
The exact text of the clause	Yes
The survival period provided	Yes
An appraisal of the clause	No

What the search cost

Indicator	Value
Contracts searched	214
Duration	12 seconds
What it saves	Knowing the question has a quantified answer before putting it

The gain is not reading 214 contracts: nobody would have done it. The gain is being able to put a question to an adviser that bears on 31 identified contracts rather than on a portfolio.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
