

Research note — state of the question on a classification

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Provisions in force at the date of the facts, decisions sorted into three families · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **No real decision is cited here:** the attachment shows the FORM of a research note, what it carries and what it opens. **In a real note, every line points to the document as published, openable in one click from the note.**

What the note carries, in this order

Part	Content	Why it is there
Applicable provisions	In the wording in force at the date of the facts	A provision amended since the facts does not apply to the file — the first pitfall of a search done in haste
Decisions retained	Court, date, full reference, extract of reasoning	The extract, never a summary of the extract

Part	Content	Why it is there
Sorting	Three families: supporting the classification, departing from it, scope later discussed	Gives the state of the question rather than a list
Flag at the top	One decision retained was followed by a reversal	At the top and not in a footnote
Sources	The published document, openable from the note	A decision not read in the library is not cited

A reversal is when a higher court abandons the solution it had been applying. Both decisions are given in order, with their dates and their reasoning — the judge settles their scope in thirty minutes, sources open, instead of half a day of searching.

The citation rule — and why it has no exception

Situation	What the agent does	What it hands over
The decision is in the reference library	It is cited with its full reference and its extract of reasoning	The document, openable in one click
The decision is not there	It is not cited — no approximate reference, no reconstructed number	The question raised, where it is to be searched, and the access request already drafted
The provision changed since the facts	Both wordings are given, with the date of entry into force	The list of pending cases whose facts predate it

The time this moves, across the 380 searches of the year

Step	Before	After	Who does it
------	--------	-------	-------------

Querying the library, gathering, checking the dates	1 h 10	0	The agent
Critical reading and assessment	30 min	30 min	The judge
Total	1 h 40 — 33 % of the scale	30 min — 10 %	—
Annual gain	—	443 hours	Given back to the service

The court's 9 most worked questions account for 214 of the 380 annual searches. Monitoring them continuously means handling more than half the load before it arrives.

For the court to settle

List of the 9 questions placed under monitoring, settled by the court: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
