Chasers prepared — 18 files

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

3 requests corrected · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No chaser is sent.** A chaser carries the department's name, sets a deadline and can have consequences for the file.

Wait	Files	Document named precisely	Original request correct?
30 to 45 days	7	**Yes, for all 7**	7 of 7
46 to 60 days	6	**Yes, for all 6**	**4 of 6**
61 to 71 days	5	**Yes, for all 5**	**4 of 5**

Three original requests were wrong. Those three residents have spent two months hunting for a document that will not be required of them — chasing on the same basis would have extended the error by as much again.

The three corrected requests

File	Document originally requested	Document actually required	Source of the error
2026-0788	Employment certificate	**Signed declaration**	**Standard letter not updated**
2026-0801	Tax assessment, year −2	**Tax assessment, year −1**	Manual entry
2026-0834	Employment certificate	**Signed declaration**	**Standard letter not updated**

What each chaser contains

Element	Present?
The precise document awaited, named	**Yes**
Date of the first request	**Yes**
How to return it	**Yes**
A deadline	**To be set by the department**
A statement of consequence if absent	**To be set by the department**

The last two are left to the department: an announced deadline and an announced consequence are commitments, and they vary by scheme.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
