Highways variations — cumulative

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

4 variations · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No regulatory threshold is quoted.** The document adds up percentages; at what point a variation becomes irregular depends on the nature of the contract and the procedure, and that question goes back to procurement.

Variation	Date	Grounds	Share of original value	Cumulative
1	14/03/2024	Additional work under instruction	4.1%	4.1%
2	22/09/2024	Scope extension agreed in committee	8.7%	12.8%
3	11/04/2025	Unforeseen ground conditions	6.6%	**19.4%**
4, in preparation	—	Estimated	**6.2%**	**25.6%**

The useful figure is the one on the last row, and it exists nowhere today.

Each variation was examined alone; the cumulative figure takes opening four files.

What the agent does, and does not

Action	Performed?
Add up notified variations	**Yes**
Add the effect of the draft in hand	**Yes**
Quote a regulatory threshold	**No**
Say whether variation 4 is regular	**No**
Block preparation of the variation	**No**

What is proposed

Show the cumulative figure and the draft's effect when each draft variation is opened. Not an alert, not a block: a number, where it is useful — that is, before drafting, not at signature.

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
