Highways 2027 tender pack — 4 inconsistencies

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

1 blocking · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **No document is corrected.** The pack will ground the bid analysis: its coherence is an act of the buyer.

The blocking inconsistency

Document	What it says	Consequence
Tender rules	3 weighted criteria: price 50, technical 40, programme 10	—
Specification, cl. 2.4	**Names a 4th criterion: environmental performance**	**Unweighted, therefore unscorable**

A bidder who answers the specification conscientiously works on a criterion that will not be scored. That is the kind of gap an unsuccessful bidder finds, and they find it after the award.

The other three, non-blocking

#	Gap	Documents concerned	Effect
2	Divergent quantity: 1,240 m² / 1,190 m²	Price schedule and specification take-off	Bids not comparable
3	Compulsory visit with no date or slot	Rules and timetable	Arranged case by case
4	Two clauses referring to each other	Conditions cl. 7.2 and 9.4	Clause inapplicable

What is supplied, and what remains

Element	By the agent	By the buyer
Matching of the 4 documents	**Yes**	—
Exact location of each gap	**Yes**	—
Correcting the pack	—	**Yes**
Deciding to publish or defer	—	**Yes**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
