Annotation backlog — 1,460 sorted

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

318 over six months old, seven weeks to clear · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The backlog is sorted, not stacked:** classifying by type decides the checking effort, because not every annotation calls for the same attention. **The agent enters nothing — it prepares the match, and entry follows sign-off.**

The backlog, by type

Type of annotation	Volume	Checking attention	Reason
Marriage and divorce	**1,010**	Standard	**The notice received carries the same identities as the record concerned**
Death	200	Standard	Identities and date, with no effect on parentage

Type of annotation	Volume	Checking attention	Reason
Acknowledgement of parentage, change of surname or forename	**250**	**Heightened**	**They touch on parentage and identity — presented separately, never mixed in with the rest**
Total	**1,460**	—	**including 318 waiting more than six months**

The clearance calculation, reproducible

Term	Value	Source
Annotations to enter	**1,460**	Notices received and not processed
Sign-off rate held over the trial week	**45 a day**	**Record kept by the head of the registration service**
Duration	**7 weeks**	**Without a single hour of extra help and without touching the current flow**
Current flow during the clearance	About 60 a week	Prepared in parallel

What the backlog costs, and to whom

Situation	What happens today	What happens with a 4-day turnaround
A family asks for a copy of a record	**The record may not state the situation as it stands today**	**The copy carries every annotation, up to date**
A notary asks for a full copy for an estate	**The same stakes, with consequences for the estate — and the record up to date from day 4**	The record is up to date

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Situation	What happens today	What happens with a 4-day turnaround
Discovery of the discrepancy	**At the counter, in front of the member of the public**	**It does not happen**

What the agent does, and what belongs to the service

Step	Who does it
Identify the record the notice concerns	The agent
Place the notice and the record side by side, discrepancies highlighted	The agent
Draft the annotation in the service's own wording	The agent
Sign off	**The head of the registration service**
Enter the annotation on the record	**The service, after sign-off — and it is that sign-off that carries proof**

> **A civil status record is altered only by the hand of whoever answers for it.**
> That is why preparation can move fast **without the checking shifting an inch.**

To be set by the council

Daily sign-off slot chosen during the clearance: _____

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
