Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. No real client. **The four set-aside rows come first**, not in an appendix: they are what justifies not chasing, and an exception buried at the end of a table does not get read.

Set aside — reason given

Client	Invoice	Amount	Overdue	Reason for setting aside
Delmont SAS	F-2026-0412	€7,800	71 d	Written complaint 12/06, unanswered for 56 d
Delmont SAS	F-2026-0447	€3,400	58 d	Same complaint — second batch of the same order
Ateliers Roux	F-2026-0501	€3,400	44 d	Order cancelled in the CRM on 19/05
Berthier & Fils	F-2026-0398	€890	82 d	Paid 28/07 — unmatched transfer

The Berthier invoice has already been paid. It shows as outstanding because the bank reconciliation was never done, not because the client owes anything. Chasing it would have been a commercial error for nothing.

isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
