The watch on police powers — five sources, 86 texts tracked, 24 months caught up

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

The station's watch scope, texts tracked over 12 months, 24-month catch-up · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The fifth source is local: the municipality's own council resolutions, without which a national watch does not see the law that applies here. No order template was modified: templates are settled by the head of service and the chief executive of the municipality.**

The five declared sources

Source	What it brings	Sweep frequency	Connected since
Légifrance — consolidated versions	CGCT, Internal Security Code, Highway Code: dated article versions	Daily	01/01/2026
Official Journal	Acts and decrees as published	Daily	01/01/2026

Source	What it brings	Sweep frequency	Connected since
Prefecture's register of administrative acts	Prefectoral orders affecting the municipality	Daily	01/01/2026
Published administrative case law on the mayor's police powers	Published decisions, with their scope	Weekly	01/01/2026
Resolutions of the municipal council	**Local regulations: market, public space, animals, noise**	At every sitting	**02/05/2026 — local source added, see below**

What the local source brings, and what national law does not say

Nature of the local text	Number over 12 months	Where it is published	What it affects at the station
Resolutions amending the weekly market regulations	**2**	**The municipality's own register of resolutions — never the Official Journal**	**3 order templates cite those regulations**
Resolutions on the occupation of public space	**2**	**Same register**	**1 order template**
Resolution on roaming animals	**1**	**Same register**	**1 reference answer**
Total	**5 of the 86 texts tracked**	—	—

Why the list of sources is published, and not just the result: a watch is worth exactly its scope, and that scope should be read here rather than discovered on

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —

a challenged order. The five sources are what I look at; the fifth is the one nobody thinks to connect, and it is the one that touches the most templates.

The 24-month catch-up

Catch-up result	Number	Effect on templates
Resolutions recovered over 24 months	**34**	—
Of which touching a template or a reference answer in service	**6**	**Templates marked « to be reviewed » in the signature folder**
Templates modified by the agent	**0**	**The head of service and the chief executive settle the templates**

Time to reach the templates, before and after

Step	Before	After
Text or resolution published → spotted	**21 days on average**	**Under 24 hours**
Spotted → templates affected identified	Not done systematically	**Automatic, by article or regulation citation**
Watch in operation	**Suspended for lack of time**	**Continuous, two-page weekly note**

Weekly watch note — with administrative case-law review: yes / no — settled by the head of service, on: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
