Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **The three scenarios are three calculations made on the year's payment orders and on published resolutions — none is a recommendation from the agent.**

What the note establishes before any scenario

Fact	Value	Where it is checked
Businesses served	**318**	Register of special charge agreements
Producers under 1,100 litres a week	**212**	Collection department lift records
Producers above 1,100 litres	**106**	Collection department lift records

Fact	Value	Where it is checked
Real cost borne by the authority	**Added up line by line**, each line pointing to its payment order	Payment orders for the year
Rates of the 5 comparable authorities	Taken with the date of each resolution	Published resolutions

The three scenarios, costed on the 318 businesses

Scenario	Real cost coverage	Effect on the 212 small producers	Effect on the 106 large producers
A — roll-over	**68 %**	Unchanged	Unchanged
B — alignment on real cost	**100 %**	**47 would exceed the 5 comparables**	Aligned on the comparables
C — two-band scale	**94 %**	**None above the comparables**	**Bear the effort**

> **The council can ask for a fourth scenario in session: it is costed before the item ends. The rate is voted — and it is the vote that makes it enforceable against a business that would challenge it, and that guarantees equal treatment between two firms of the same volume.**

Proposed next step: the special charge agreement is generated from the resolution in force, from the day after the vote. **The following year's 318 agreements will come out at the voted rate without a writer having to think about it.**

Scenario adopted by the council: _____ · Date of vote: _____
