Helianthe article — 812 words, sources per paragraph

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

First draft to review · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **Every figure in the article carries the source that establishes it.** A passage no source held by the studio or the advertiser accounts for stays **highlighted** and is not published as it stands.

The structure produced

Level	Content	Query handled	Characters
Title (H1)	Solar panels for a small business: what it changes on the bill	**Main**	82
Standfirst	The promise and the outline in four lines	Main	310
H2 · What a 9 kWp installation produces	Technical specifications, orders of magnitude	Secondary 1	1,420

Level	Content	Query handled	Characters
H2 · Self-consumption or resale	Both models, with their conditions	Secondary 2	1,180
H2 · The support available	Self-consumption grant, applicable VAT	Secondary 3	1,260
H2 · Three installations, three situations	Cases taken from site reports	Main	980

Where each fact comes from — the source table

Fact used in the article	Source	Dated	Status
Output of a 9 kWp installation	Helianthe product sheet	v4, 01/2026	Established
Amount of the self-consumption grant	Text in force, version cited	Yes	Established
Applicable VAT rate	Text in force, version cited	Yes	Established
Three site situations	Site reports opened by the advertiser	2025	Established
“Up to 40 % savings on the bill”	**Advertiser brief only**	**No**	**HIGHLIGHTED — not publishable as it stands**

> **Why that passage stays highlighted, and it isn't caution.** A published numerical claim commits the advertiser: it must be able to say what the claim rests on, years later, to a customer or to a regulator. **And a published figure gets copied: this one would end up on the service page, in two scripts, in a newsletter and in tender responses.**

Legal notice (in French): bluelemonagent.ai/mentions-legales

The path to making it publishable — letter ready to sign

Step	Who	Timing	What it yields
Request the meter readings of 3 comparable installations	Studio to Helianthe	Letter written, awaiting signature	The basis for the calculation
Calculate the observed savings, upper and lower bounds	Agent	Day of receipt	A dated, sourced range
Rewrite the passage	Agent then writer	20 minutes	**A true, sourced sentence, and more persuasive than an “up to”**
Approval	Advertiser then editorial director	—	Publication

The time moved on this production

Area	Before	With the agent	What stays with a human
First draft of an article and its derivatives	**60 % of the time of a production**	**12 %**	**The review, the angle and the arbitration**

Date the installation readings are expected from the advertiser: _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
