

Forty-one de-indexed pages

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

Since 12/05/2026 · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **The agent does not remove the setting**: it provides the exact line and leaves the intervention to whoever releases.

Element	Value
Redesign date	12/05/2026
Origin of the setting	Test environment
Pages affected	41
Share of the site	9%
Share of prior traffic	28%
Time to leave results	3 weeks
Time elapsed	12 weeks

The 41 pages are 9% of the site and 28% of the traffic: they are the best pages. That is what makes the loss large and the page count reassuring — two opposite readings of the same fact.

Why nobody saw it

Element	What was observed	What was concluded
Traffic chart	Gradual fall over 12 weeks	Seasonality
Number of pages	41 of 470	"Few pages"
Correlation with the redesign	Not looked at	—

The redesign and the traffic chart live in two different tools. It is the most frequent reason a visible cause stays invisible.

What is provided

Element	Provided?
The 41 pages	Yes
The exact line to remove	Yes
Each page's traffic before the redesign	Yes
An honest recovery estimate	Yes
A promised timescale	No
A promised level	No

The pages do not return to their previous positions. It takes several weeks, some will not recover their place, and saying so now avoids presenting a partial recovery as a failure in two months.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
