

Duplicate criterion — 428 alerts down to 96

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 24/09/2026

23.1 % of groundless discrepancies, down to 5.6 % · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **This is the figure that does not flatter the agent, and it is better that it comes from him than from a family annoyed at being called back for nothing.** It is given with its measured cause, what was written, and the following quarter.

The first quarter

Measure	Value	Share
Discrepancies flagged	320	100 %
Groundless after checking	74	23.1 %
of which from the duplicate check alone	56	76 % of the groundless discrepancies
of which scattered one-off cases	18	24 %

The cause, measured and not assumed

LINDBERGH FORMATION — a simplified joint-stock company with share capital of €250,000 · Registered office: 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114 · SIRET 817 946 114 00029 · VAT FR 60 817 946 114 · "Blue Lemon Agent" trade mark · Training-provider registration no. 119 108 635 91 (Île-de-France prefect — this registration does not amount to State approval) · Qualiopi certified, no. 03896, for the "training actions" category · contact@bluelemonagent.ai · dpo@bluelemonagent.ai · Hosted in France.

The check matched **the family and the amount**, without reading the service or the attendance slot. **Now a family with two children legitimately pays the same amount twice on the same day — once for the canteen, once for after-school care —, and since the rates for those two services are identical at the first band, the two payments looked exactly alike. It was not a reading error: it was a criterion that was too short.**

The tightened criterion, replayed over twelve months

Element	Original criterion	Tightened criterion
Points matched	Family, amount	Family, amount, service used, attendance slot, invoice reference
Alerts over twelve months	428	96
Duplicates actually confirmed	37	37 — all kept
Checks spared the revenue manager	—	332
Families no longer called back for nothing	—	332

All 37 confirmed duplicates are kept by the tightened criterion, and that is the one point on which there was no trade-off: **an undetected double payment means a family paying twice.**

The following quarter, criterion in force

Measure	Quarter 1	Quarter 2	Difference
Discrepancies flagged	320	305	—

Measure	Quarter 1	Quarter 2	Difference
Groundless after checking	74 — 23.1 %	17 — 5.6 %	–57
of which families with two children	56	0	The cause has gone, not merely the symptom

What stays with the authority

Act	Duration	What it makes enforceable
Settling the tightened criterion	One signature	A check settled by the revenue manager is enforceable against the schools department as against the public accountant — that is what makes it a rule and not a practice

The criterion is written and already measured over twelve months: the decision is taken on figures, not on an intention, and **it runs from the evening session.**

For the authority to settle

Date the tightened criterion is settled: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
