Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration. **"Our company is recognised for" is not false: it is nothing.** It commits to nothing, cannot be verified, and earns no points.

What the agent writes on a criterion

Element	Accompanied by
Resources assigned	Their numbers
Organisation described	The internal document that sets it, and its date
Lead times	The measurement behind them
References	The contract, the year, the value

What it never writes

The two criteria with no documented evidence are flagged, not filled in. A criterion addressed by an empty sentence looks addressed and is not — the only way to lose points without knowing.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
