Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration; the person is shown by a letter. **It is this arrangement's only automatic block.**

File	Status	CV attached	Agent's action
1	**Live contract**	**Yes**	**Flagged, terms cited**
2	**Live contract**	**Yes**	**Flagged, terms cited**
3	Unawarded	**Yes**	**CV blocked**
4	Unawarded	**Yes**	**CV blocked**
5	Unawarded	**Yes**	**CV blocked**
6	Unawarded	**Yes**	**CV blocked**

The agent does not say what the departure entails on the two live contracts. It cites each one's clause on changes of personnel and leaves it to be read — depending on what each provides, it may have no consequence.

What the agent makes of this departure, and what you gain by it

Situation	What the agent does	What you gain
The named team member leaves	**The 6 files naming them are pulled out, with a replacement proposed from the headcount**	**A named team member is a commitment: you update it everywhere with one decision**
The mention has to go	**The removal is prepared and traced, file by file**	**Nothing moves silently: your responses stay defensible**
The contract terms cover changes of personnel	**Each of the two contracts' clauses is cited, text in hand**	**You read the applicable text instead of hunting for it — and depending on what it provides, the departure may have no consequence**

What is proposed

Today	Proposed
The CV is copied into each file	**The CV is linked to the headcount and read from it**
6 copies live lives of their own	**One departure updates all 6**

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
