Eleven employees — seven in one department

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for demonstration; employees are shown by a letter. **No list of names is circulated**: each manager sees their own people, management sees the volumes by department.

Department	Headcount	Employees over 30 days	Share of the department
Department B	**19**	**7**	**37%**
Department A	24	2	8%
Department C	31	1	3%
Department D	17	1	6%

These are not eleven individual choices. A department where seven of nineteen people could not take their leave describes a workload, not preferences.

What four months still allows

Time to end of period	What remains possible
4 months	**Reorganise, redistribute, bring in cover**
2 months	Redistribute
6 weeks	**Loss or carry-over**

The routing

Recipient	What they see
Manager of department B	**Their 7 people + their department figure**
The 4 other managers	Their own people
Management	**Volumes by department, no names**
The employees	**Nothing**

> **Employees receive nothing.** A reminder sent to somebody who could not take their leave is an unpleasant remark, and it changes nothing about the cause.

> **Request a demo with your own documents**
> This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
