Technical framework — where residents' data lives, and how you leave

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

Local inference, read-only, processing in the EU targeted · fictional document

Fictional document — demonstration example

This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

Fictional document, produced for the demonstration. **It describes the architecture actually proposed.** A town hall handles civil status records, planning files and residents' requests: **the most sensitive data the municipality holds — and it does not own it, it holds it in trust.**

The two deployment modes, at the municipality's choice

Mode	Where computing happens	What leaves the network	For whom
Local inference	**On a machine at the town hall**	**Nothing**	Municipalities that already have a server
Isolated resource	On a dedicated server hosted in France, under French law	**Nothing outside the European Union**	Municipalities that would rather not run a machine

Local inference means the model computes on your machine: the text of a civil status record or a planning file crosses no outside network to be processed. **In both cases the resource is dedicated to Vaux-sur-Cerne: no sharing with any other municipality** — the condition of the continuity of your public service.

What protects residents' data

Point	Implementation	What the municipality can write to a resident
Training	**No resident data feeds any model, neither ours nor a third party's**	“Your data trains no system”
Write permissions	**The technical read account has no write permission**	“The tool cannot modify any record, technically”
Encryption	In transit and at rest	“A stolen medium stays unreadable”
Role-based access	**Rights follow the job**: the nursery assistant does not open planning files, the technical officer does not open civil status records	“Each member of staff sees only what their duties require”
Logging	Who asked for what, when, and what the system produced	“Every output is traceable”
Hosting	**France, under French law**, architecture designed to reduce exposure to extraterritorial legislation, location alone not being enough to guarantee immunity	“Deployment objective: processing and access within the European Union”

The acts reserved to a person — and what the agent brings to each

Reserved act	Whom it belongs to	What the agent has already done when it arrives

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Signing an act	**The mayor**	**The draft is built on the municipal template, checked against the resolution in force, and comes back with its control note**
Issuing a civil status certificate	**The civil status registrar**	**The copy is built from the register, the applicant's standing checked — the registrar's act is performed on a file already prepared**
Judging the regularity of an act	**The municipality and the State's representative**	**The control note, point by point: what complies, what is missing, and the municipal text that requires it**
Giving the processing opinion on a planning application	**The shared processing service**	**The pre-processing note, confirmed as it stood 39 times out of 47 last quarter**
Awarding a contract	**The municipality**	**The grid filled in and scored, the ranking and the assessment report written up — the one that defends the choice before the public accountant**

Leaving — verifiable before the vote, not after

Item	What happens to it on the day you stop	What stays with the municipality
The index	**Deleted**	**The twelve years of files have not moved by a single byte** — same folders, same names, same rights
The log of enquiries and outputs	Handed over in an open format, or destroyed	**The council chooses, and the question is settled at go-live**

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —

Item	What happens to it on the day you stop	What stays with the municipality
The 34 revised templates	They are already in your files	**They are made of the municipality's own material: they belong to it**
The 12 standard answers, in plain French and in a settled easy-read version	Exported in a format readable without us	**They stay usable at the counter and on the website**
The subscription	**Annual, with no tacit renewal**	**It is renewal that requires a vote, not stopping**

A dry-run exit is proposed at the end of the first quarter, half a day: we switch off, we check that the town hall works exactly as before, we switch back on. **The council will know what the promise is worth before committing to a second year.**

For the municipality to settle

Deployment mode chosen (local inference / isolated resource): _____

Request a demo with your own documents

This document is a fictitious example. To see the agent work on your own documents, request a demo from its page.

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually
