Substantive corrections — 31, then 4

LINDBERGH FORMATION — 16 rue de Maillé, 91310 Montlhéry, France · Companies register (RCS) Evry 817 946 114

Document issued on 09/11/2026

9.1 % → 1.3 % after the templates were revised · fictional document

> **Fictional document — demonstration example**
> This document is produced by the Blue Lemon Agent website to illustrate what an AI agent hands to its users. The companies, matters, amounts and people in it are invented. It has no legal, accounting or commercial value.

> **Fictional document**, produced for the demonstration. **This is the figure the agent publishes about itself, and it is better coming from it than from a resident.** It is given with its measured cause, what was done, and the following quarter.

The first quarter

Measure	Value	Share
Outputs prepared	**340**	100 %
Corrected on substance before sending	**31**	**9.1 %**
of which built on an out-of-date template	**24**	**77 % of the corrections**
of which unusual cases with no precedent in the municipality	7	23 % of the corrections

The 24 corrections caused by an out-of-date template

Nature of the error	Number	Template involved
Village hall rate replaced by a resolution	**11**	Hire agreement
Repealed resolution cited	8	Temporary roadworks decree
Address of a service that has moved	5	Accommodation certificate

It was not a writing error: the agent was faithfully following a template that had aged. **The cause was in the municipality's own files, not in the drafting** — and that is why it can be fixed once and for all.

What was done

Measure	Effect
Every template carries the governing resolution and its date	**The match is visible at a glance**
Automatic flagging of any template amended by a later resolution	**The day after each council — the 34 templates stop ageing in silence**

The following quarter

Measure	Quarter 1	Quarter 2	Change
Outputs prepared	340	310	—
Substantive corrections	**31 — 9.1 %**	**4 — 1.3 %**	**−27**
of which caused by an out-of-date template	24	**0**	**The cause has gone, not just the symptom**

The rule that holds all the rest together — asking rather than deducing

LINDBERGH FORMATION — Blue Lemon Agent — Companies register (RCS) Évry 817 946 114 —
Legal notice (in French): bluelemonagent.ai/mentions-legales

Situation	What the agent hands over	What it gives
A document is missing from a file	**What is missing, where it looked, who holds it — and the request already drafted to its recipient**	**46 missing values over the quarter, 46 requests prepared, 41 answers back within eight days**
A rate cannot be found	The absence flagged, the reference back to the register of resolutions, and the request ready to go	**A guessed value would be indistinguishable from a read value: that is what makes 1.3 % a figure you can rely on**

The protection that matters for the signature

Indicator	Two quarters
Outputs prepared	**650**
Approved by a person before sending	**650**
Corrections made before sending	**35 out of 35**
Corrections made after sending	**0**

> **That is exactly what the review is for, and that is why it is not negotiable.** A guessed value is indistinguishable from a read value — **that is what would make everything else unusable.**

For the municipality to settle

Chosen frequency for the report on substantive corrections: _____

Scope of this document: the service operated by Blue Lemon Agent. For an agent deployed at your premises, the applicable location is that of the architecture set out in the quotation and verified before commissioning; local execution is announced only for the configuration explicitly described and accepted in the quotation; the applicable isolation depends on the deployment mode set out in the quotation, no dedicated isolation being presumed; the encryption mechanisms in transit and at rest, their components and key management are those documented for the architecture chosen; roles and permissions are configured and accepted for the identities and systems actually connected; the events logged, their content, their retention period and who may access them are defined for the deployment chosen.
